skills

Having recently finished a Product Design degree at Sheffield Hallam University, I have developed and expanded a wide range of design skills.

Through my degree all my projects have been of the highest quality and, when run in conjunction with companies (Gillette and Ideal Standard), my work has been short listed to be presented to their R&D departments. My level of attention to detail throughout my work leads to design projects finished to the highest of standards, whether fully resolved or at a conceptual level.

My work has been selected to be exhibited at the 2012 New Designers exhibition in London. Further to this I have been awarded awarded

With excellent communications skills whether through verbal communication or drawing, I'm driven to produce the best quality results both as part of team or working individually. I have a wide range of model making skills across a broad range of materials and processes. Further to this I have developed an excellent knowledge of manufacturing processes from metals through to ceramics.

I have good knowledge of Solidworks and Adobe packages such as Photoshop, Bridge and Illustrator as well Microsoft Office.

Full UK driving licence – No penalties

education

Sheffield Hallam University, South Yorkshire (2009 – 2012)

BA(Hons) Product Design (awaiting classification 04 July 2012)

Richard Huish College, Taunton, Somerset (2006 – 2008)

AS level	A level
E - Physics	B - Geography
B - Art	D - Chemistry

Uffculme School, Uffculme, Devon (2001 – 2006)

10 A* to C GCSE's Including Maths, English and Design Technology

work experience

October 2008- September 2010 (During university vacations)

Aquavision

During my summers I created new ponds and restored old ponds to a new condition. I also took responsibility for management of the fish farm on a day to day basis when necessary.

November 2008 – April 2009

Esprit Holidays Ltd

I worked as part of a close child care team looking after up to 35 3-13 year old children with some one-to-one care. I also worked closely with the parents to ensure their children had a good week. Our hotel finished the winter season in 4th place against some 25 other hotels

June 2008- September 2008

Rock and Rapid Adventures

I was a huge part of the organisation of the Hard Rock festival where I liaised with companies to arrange sponsorship and prizes. I've also instructed children on residential holidays, team building days and climbing sessions.

July 2006 – November 2008

Waterloo Cross Public House (Marston's Group)

Alongside the head chef I prepared starters, main meals and desserts under constant time pressure, often running the kitchen when staff shortages occurred.

Summer 2006

TS Converting Ltd, Taunton

1 week work experience with TS Converting - international slitting and rewinding machines. Further work over following summer carried out and design apprenticeship offered but declined.

interests

I'm extremely interested in rock climbing and climb across the UK and Europe I've been climbing for roughly 6 years. Whether it be bouldering, trad climbing or sport climbing I try to get out at every opportunity.

Alongside climbing, photography is a huge passion of mine from landscapes to climbing photography. I've had many shots published over the last couple of years both online and in "Climber" one of the UK's leading climbing magazines.
